

Practice with Lumie 2

How to Use miniLUK Controller:

1. Place miniLUK Controller alongside the workbook (not on top of the workbook).
2. Open miniLUK Controller case and place all 12 tiles with number-side facing up on top of the upper see-through lid. The black number 1 to 12 printed on the bottom half of the controller case will be the place to put the tiles based on the answers.

Example:

Please see Page 1 – “Solve the problem”

1. Pick up tile **1**, and refer to exercise no. 1 on page 1.
2. Answer the question: “ $5+2=\square$.”
3. The answer is **7**.
4. Find **7** from the answer column on the right. Then find the corresponding number located on the lower right corner of answer **7**, which is 5.
5. Place tile **1** on top of the field 5 of the bottom half of the controller case.
6. Repeat the same step to finish all 12 exercises.
7. Close the controller case, flip it over so the back red side facing up, then open the red side again.
8. Compare the pattern to see if all questions were answered correctly.
